German-French Hackathon/Data Challenge in Passau

UNIVERSITÄT PASSAU

SAVE THE DATE
11/28 - 11/29 2023

DATA CHALLENGE - WEB SPAM DETECTION:

The internet is full of fascinating web pages, but also flooded with spam content. We see it as our responsibility to separate the righteous from the wicked by applying state-of-the-art ML & NLP techniques. All teams are invited to participate in our Data Challenge on web document classification and compete with each other on a shared leaderboard.

BUILD YOUR OWN CONVERSATIONAL SEARCH ENGINE:

We are proud to announce that the OpenWebSearch.eu project is now able to provide a ready-to-use Web Index, which allows you to build your personal Search Engine. But that's not all: the teams are invited to harness the latest Generative AI tools and implement their own conversational assistant for a maximum of pleasant web search experience.
